March 08.03.2010

Dr. Christian Püttmann appointed as Managing Director Vetro Solar GmbH

The Norwegian based company Vetro Solar AS appoints Dr. Christian Püttmann as Managing Director for its German daughter company, Vetro Solar GmbH, effective on March 1st, 2010.

Dr. Christian Püttmann (46) is an industry insider and possesses broad experiences from glass business, production and processing. After studying chemistry he spent 10 years with the globally active glass concern Pilkington where he held different positions in R & D, production and management. After several other employments in the glass industry he has been working for DTEC Engineering & Consulting GmbH as Technical Director the last six years; a company providing planning, engineering, erection and commissioning of complete glass works worldwide.

Vetro Solar is dedicated to provide customized glass products and solutions to the PV industry, with the ambition of doing so on a GW scale within a few years. In order to continuously enhance production processes and glass product performances Vetro Solar cooperates closely with leading research institutes within PV.

At the moment Vetro Solar GmbH builds its first solar glass processing plant in Solar Valley in Sandersdorf-Brehna, Saxony-Anhalt.
